1 Introduction

Hello, world!

This is a comment

2 Text

This sentence is in boldface

italicized maybe in a sentence **something**

one inside the other

also italicized???

This is an important sentence, maybe a quote or something, and this *word* is very important. Let's make this sentence longer than one line.

Large words

3 Math mode

This is an inline formula $\sum_i \frac{i}{22}$, it appears within the text

This is a displaystyle formula

$$\sum_{\alpha=0}^{2^{10}} \frac{2}{\alpha} 22$$

it appears on its own line

How sqrt works: $\sqrt[4]{25}$

$$\begin{aligned} e^x &= \left(\sum_{i=0}^{\infty} \frac{x^i}{i!} \right) = \\ &= \left(1 + x + \frac{x^2}{2} \right) + \frac{x^3}{6} + \dots \end{aligned} \tag{1}$$

$$\left\{ x \in \mathbb{R} \quad \text{such that} \quad \frac{\sin(x)}{x^2} > 0 \right\} \mathbb{R}$$

$$\sum_i$$

The first equation we wrote is (1)

4 Environments

4.1 Lists

- One **item**
- Another $2 + 2 = 4$

- a third one

$$\sum_{i=0}^n$$

- A sublist:
 - + First subitem
 - + and so on
- Again in the main list

I One

II Two

III Actually three

IV Three (or not)

Tables

Let's write a table:

This is a table	second column	third column
Things	a	$2 + 2 = 4$
more things	b	c

$$\begin{pmatrix} \int_0^1 e^x & \frac{2}{25} \\ 0 & 0 \\ 1111 & 234\alpha \end{pmatrix}$$

$$\begin{pmatrix} \int_0^1 e^x & \frac{2}{25} \\ 0 & 0 \\ 1111 & 234\alpha \end{pmatrix}$$

$$\begin{pmatrix} 1 & 2 \\ 3 & 4 \end{pmatrix} \xrightarrow{L2 \rightarrow L2 + L3} \begin{pmatrix} 1 & 2 \\ 4 & 6 \end{pmatrix}$$

5 Last section

In section 4.1 we saw how to write lists

My Theorem 5.1 (Gauss). *The equation $2 + x = 4$ is true for $x = 2$.*

Proposition 5.2. A less important fact

+100

My Theorem 5.3. *Another important fact.*

Achtung. It is a common mistake to think that $2 + 2 = 5$

$$\binom{4}{5}$$
